SUMMARY

Detail-oriented Full-Stack Developer and Technical Logistics professional specializing in building robust, high-throughput backend applications using Java and Spring Boot. Combines an academic foundation in Computer Science with over 2.5 years of practical distribution center leadership. Expert at mapping complex physical operational workflows (inventory slotting, multi-tenant distribution networks, high-volume processing) into efficient database schemas and RESTful web services.

SKILLS

- **Languages & Core:** Java, JavaScript (ES6+), HTML5, CSS3, Data Structures & Algorithms (DSA), OOP, Problem Solving
- **Backend Frameworks:** Spring Boot, Spring MVC, Spring Data JPA, Hibernate, JWT Authentication, REST APIs
- **Databases & Storage:** MongoDB, MySQL, Relational Database Design, NoSQL Schema Optimization
- **DevOps & Tools:** Docker, AWS, Git/GitHub, Postman, OpenAPI/Swagger, Spring Actuator, GitHub Actions (CI/CD)

PROJECTS

ShrinkPath — URL Shortener & Analytics API | *Java, Spring Boot, MongoDB, Docker, Git*

- Architected and built a production-style microservice utilizing **MongoDB** for high-write persistence and scalability.
- Implemented strict defensive security measures including DNS-aware validation for Server-Side Request Forgery (**SSRF**) mitigation and **BCrypt** password-protected gates.
- Designed a multi-policy system supporting custom link expressions and "burn-after-N-clicks" logic.
- Built a custom analytics engine recording per-click metrics using secure, hashed IP fingerprints to guarantee privacy compliance.
- Containerized the complete application stack using **Docker** and automated deployment pipelines with **GitHub Actions**.

Smart Life Admin Assistant | *Java, Spring Boot, React.js, MongoDB*

- Developed a full-stack, data-driven task and administration ecosystem utilizing a decoupled frontend-backend architecture.
- Engineered an algorithmic prioritization scoring engine (0–100) factoring in custom urgency weights, category thresholds, and real-time expiration boundaries.
- Integrated **JWT Authentication** and **BCrypt** hashing to secure multi-tenant user boundaries and state.
- Built a highly responsive dashboard in **React.js** to map and display complex backend analytical payloads.

PROFESSIONAL EXPERIENCE

Best Buy Distribution Center – Vancouver, BC

Logistics Team Lead / Waving Specialist / Warehouse Associate | **May 2023 – Present**

- Led warehouse workflow optimization and high-volume order "waving" operations, directly managing inventory allocation across multiple facility zones.
- Collaborated daily with enterprise Warehouse Management Systems (WMS) to coordinate inventory slotting, inventory tracking, and distribution metrics.
- Analyzed physical supply chain constraints and bottlenecks, translating operational friction into actionable system optimizations for cross-docking and inventory counts.
- Supervised floor associates, ensuring peak performance metrics, high order-fulfillment accuracy, and real-time problem-solving under tight delivery schedules.

Warehouse Team Lead & Shipping Operator | August 2023 – March 2025

- Spearheaded afternoon shift execution, directly handling and coordinating the assembly, sorting, picking, and staging of bulk consumer electronics.
 - Safely operated various material handling equipment to transport inventory across shipping lanes, ensuring proper weight distribution and zero product damage inside trailers.
 - Handled heavy, repetitive physical workflows, manually lifting and sorting freight up to 50 lbs while building stable, securely wrapped skids for transit.
 - Utilized RF guns and computer systems to scan, verify, and document product quantities and item types against bills of lading, eliminating shipping discrepancies.
 - Ran daily pre-shift meetings focusing on safety parameters, throughput goals, and proper lifting mechanics to maintain an injury-free floor culture.
 - Maintained active certifications as an MHE reference and on-site First Aid Attendant to immediately address and prevent warehouse hazards.
-

EDUCATION

- **Associate of Computer Science (2025)**
Langara College | Vancouver, BC
Core Focus: Advanced Data Structures & Algorithms (AVL trees, graphs, dynamic programming), Systems Design, Cloud & DevOps Fundamentals.
- **Advanced Software Proficiency: MS Excel (VLOOKUP, Pivot Tables), Word, Outlook, and Enterprise Service Frameworks.**
- **Active Level 2 Occupational First Aid Responder** (SkilledTradesBC/WorkSafeBC compliant)
- **Valid, Clean BC Driver’s License (Class 5)**

TECHNICAL SKILLS

- **Software & Systems: Best Buy WMS, Enterprise ERP Systems, Microsoft Office (Advanced Excel, Outlook, Word), Power BI.**
-
